THE REDCLIFF REVIEW

THURSDAY, JUNE 18, 1936

Number 32

Redcliff Wins Two Games in League Fixture

Defeat Tigers 10-0 and Medatlas
3-2 on Sunday

Redcliff Dominions copped two games in the intermediate baseball league played here last Sunday defeating the New Club Tigers 10-0 in the afternoon game and the Medatlas 3-2 in the evening.

Both games were well worth seeing and were closely contested from start to finish.

In the afternoon game the Tigers got away to a good lead with four runs in their first innings, but in the last half of the second, Redcliff took the lead. From this on the race was neck and neck.

In the last of the sixth the Tigers made a sensational play. Dominions had three men on bases and none out when who looked like a safe hit came out, they all started to run but the second baseman nabbed the fly and all three were put out.

At the beginning of the 9th the visitors were one up. They failed to tally in their last chance, and in their last Redcliff tied and had one on third. At this stage Barr came to bat as a pinch hitter and drove a fly to right field which brought the run in on the throw.

Tigers — 401 018 100 — 9
Redcliff — 151 100 002 7
The evening game was also close and turned out to be a real pitchers' battle with both well supported in the field. So close and tight was this game that five innings went by with no hits no runs and no errors, and the runs in the other frames were nicely decided.

In the sixth the visitors were one up but in the seventh Redcliff took the lead and held it to the finish, with one innings to the good.

Medatlas — 100 001 000 — 2
Redcliff — 000 010 203 — 3
McDonald and Collard as battery in the afternoon and Barr and Collard in the evening: a put up dandy game.

Winning of these two games put Redcliff on the top of the league, tying the Medatlas. Fans will remember the Review predicted that Redcliff would soon make their opponents go home.

There will be a dance at Pearsonville School on Friday evening of this week.

Swimming Pool Organized for Season

Hoped To Have Pool Ready
For July 2nd

At a meeting held in the Legion reading room last Monday evening it was decided to reorganize the Swimming Pool Association and make plans for the pool in shape for opening up the first of next month.

The following officers were elected:
President — E. L. Stone
Vice Pres. — J. Hope
Sec. Treas. — B. Allison
Ex. Com. — R. Moore, Dr. Ward, N. McDunn, H. Sangster, R. Cann, W. Hill, R. C. Hargrave, and F. Baird.

It was decided to hold aquatic sports about the middle of June with the following committee to make the arrangements: Dr. Ward, R. Moore, G. H. Works, W. Hill, J. Hope and F. Baird.

As the dressing rooms are badly in need of repairs and as fund on hand are very low it was decided to hold a tag day to raise the necessary funds to make these repairs.

Membership tickets will also be issued and will be on sale next week.

Much will depend on the success of the tag day and the sale of tickets, how long the pool can be kept in operation this season. As the swimming pool means so much for the pleasure and safety of the children and young people of the town it is hoped the citizens generally will give their whole hearted co-operation and financial assistance to this movement.

Now that the tax is taken off soap the government should buy a case and wash out the whole tax.

There was a good attendance at the dance at Lake Valley School last Friday evening and a most enjoyable evening was spent.

For attempting to burn down a government bridge near Grand Forks, B. C. a Doukhobor named Paul Vatin, was sentenced to life imprisonment.

Hon. W. A. Fellow, minister of Public Works, is at present in Medicine Hat making arrangements to start road work in this part of the province under the governments prosperity certificates plan of financing.

Remember Redcliff Stampede

KING EDWARD VIII

looks forward to meeting on Vimy Ridge many of his former comrades of the Canadian Corps and is glad circumstances will permit him to unveil Canada's national memorial there July 26th, according to a message received by Walter S. Wood, vice chairman of the national Vimy Ridge committee.

Next Tuesday, June 23rd will be the King's birthday.

A. Y. P. A. NOTES

A fair crowd of A. Y. P. A. members met in the Parish Hall on Tuesday evening for their usual weekly meeting. Further plans for the Garden Party to be held on the Victoria Lawn on Friday evening of this week were made and it was decided to have a booth at the carnival to be held on June 10th and July 1st in the Brockway Department Store. Soft Drinks and Ice cream to be sold. Ten members also were asked to volunteer help for the help for the Stampede Committee. In return for their kindness a lot of them readily responded.

At the close of the meeting, Bill Balmer, on behalf of the A. Y. P. A. presented Rev. and Mrs. H. S. Hannett, recent newcomers, with several very useful kitchen utensils for which they were charmingly thanked by the receivers. A social hour was then spent before departing.

The Jr. W. A. is putting on a sale of fancy work and home cooking also a fish pond on Saturday, June 27th, in the Parish Hall, beginning at 3 p. m. Tea will also be served.

June 27th has been set for the site of Manitoba general election. According to reports from Winnipeg Social Crediters will have a candidate in every constituency.

Prime Minister Baldwin announced Monday that an Imperial conference would be held in London next May, immediately following the Coronation of the King.

Fears for the future of U. S. wheat crop resulted in sharply higher prices in Winnipeg, Minneapolis and Chicago, last Monday net gains of 2 1/2 a bushel were scored in Winnipeg.

There are three candidates in the field in the Edmonton by-election for the legislature to replace Justice Howson. Election takes place next Monday. The candidates are Dr. W. Morish, Liberal; H. D. Ainslie, C.C.F.; Miss Crang, United Front.

Vega Lodge Had A Successful Sale

Excellent Afternoon Spent in
Their Lodge Room

A very pleasant afternoon was spent in the I. O. O. F. hall on Wednesday, June 3rd, when Vega Rebekahs held their annual sale of work, home-keeping, etc. Tea was also served.

At the conclusion tickets were drawn for guessing the weight of the cake. Also for the lucky number for a cushion which resulted in Mrs. Stone being declared winner of the cake with a correct guess and Mrs. McLeary Sr. the winner of the cushion.

Vega Rebekah Dodge extend thanks to all who patronized this annual event helping to make it the success it was.

Sales Tax is Taken Off Soap and Bricks

New Ruling Goes into Effect
Immediately

According to the last Alberta Gazette laundry and toilet soap, tiles and powder are made exempt under the two per cent Sales Tax. Lumber brick and cement are also taken off the tax list. This goes into effect at once.

Made taxable by the latest amendments to the act are passenger cars, trucks, light deliveries, commercial vehicles, motor units, truck tanks, or regular parts and accessories thereto, office equipment, stationery, invoices, billing forms cash tickets and general office and sales promotion supplies.

The Redcliff Dominions will play a league game in the basketball schedule next Sunday. The game will be played in the park at Medicine Hat.

Churches

7:30 p. m. Evening Worship
Subject: "Christ's Alternative to Communism"

"Worship is to religion, what fragrance is to the flower."

Surprise Party For Mr & Mrs. F. Cann

On Occasion of Their Leaving
For France Next Mon's

A delightful surprise was sprung upon Mr. and Mrs. Fred Cann on Friday evening last, when quite a number of their friends of St. Ambrose Church accompanied by the Vicar and Mrs. Hannett, came to spend the evening with them.

Mr. and Mrs. Cann are leaving on July 13th for France to attend the unveiling of the Vimy Memorial, which fact was the reason for the assembling of their friends to extend their best wishes.

What was played for the first part of the evening, the prizes going to Mrs. Broughton and Mr. Congram. The congratulations were won by Mrs. Ed. Ellis and Rev. Mr. Hannett.

The Vicar, on behalf of their many friends, then made the presentation of a fine camera to Mr. and Mrs. Cann, wishing them Bon Voyage, a pleasant holiday and safe return.

Mr. and Mrs. Cann were completely taken by surprise but expressed their thanks and appreciation for the lovely gift and of the kindness of their friends.

Delicious refreshments were served by the self invited guests and the evening was brought to a close with a social and musical hour and the singing of Auld Lang Syne.

Government to Put 10,000 Men to Work

Unemployed on Relief To Work
For Railroads

Agreements between the federal government, the Canadian National Railways and the Canadian Pacific Railways, under which 10,000 men will be employed on maintenance of way and betterment work during the summer, were tabled in the House of Commons by Hon. C. D. Howe, Minister of Railways.

Separate agreements were made with each of the railway systems but they are identical in terms. Each railway company agrees to increase its program of work so as to furnish employment for approximately 5,000 men. These men are to be furnished "from those now unemployed and receiving assistance" from the government.

Quebec Govt. To Appeal To Country Aug. 15

Expose of Financial Scandals is
Cause of Appeal

Hon. L. A. Taschereau, who has been premier of the province of Quebec for the past fifteen years, resigned last Thursday and was succeeded by Iren A. Godbout.

Immediately after taking office the new premier decided to go to the country for a new mandate from the people. The date for the general election was set for Saturday, August 15th.

The Liberal party has been in power in Quebec for the past 38 years. In the general election 18 months ago they narrowly escaped being defeated, coming through with only 6 of a majority which was shortly after reduced to 4.

Exposing of what the strong opposition claimed to be illegal and dishonest tactics on the part of the government, was the cause of Mr. Taschereau's resignation and the appeal to the country.

British Govt. Will Drop The Sanctions

Want Duce To Reopen A1
Trade Channels

The British Cabinet placed the first condition of the government's decision to drop sanctions.

The House of Commons will hear the announcement of the new Italo-Ethiopian policy today.

Parliamentary circles expect the British support for the withdrawal of sanctions from Italy would be linked with a demand for guarantees that the Duce will not discriminate against sanctionist countries when trade channels are reopened.

QUESTION LEGALITY OF PROSPERITY BONDS

Plans for the issue of "Prosperity Certificate" by the Alberta government are being followed with interest in Ottawa. Official comment, however, was withheld.

Interest centres around certain points in connection with the proposed issue. One of these is the question of its legality.

STETSON HATS

For Medicine Hat Stampede

The past few years have taught Customers some Worth While Lessons about Buying. One of them is that Price Tags are Less Important Than Quality. Today, VALUE-NOT PRICE-is the key to an Intelligent Man's Pocketbook. Today JOHN B. STETSON HATS are Manufactured in Canada and sold at the same prices that apply in United States.

Evidence Of Discovery By Norse Of This Continent 500 Years Before Columbus

Theory that an ancient Norse explorer and saw Prince Edward Island pier reached the Gulf of St. Lawrence then 500 years before Columbus made his landfall far to the north, was contained in a paper read before the historical section of the Royal Society of Canada by Col. Wilfrid Bruce of McGill University, Montreal.

Col. Bruce, recapitulating evidence of Norse discovery contained in ancient accounts, including the saga of Eric the Red, in the light of new evidence concluded that Prince Edward Island sailed from Iceland about 980 and was driven far south by the north, missing Newfoundland and entering the Gulf of St. Lawrence through Cabot Strait.

After reaching Prince Edward Island, on which he did not land, Col. Bruce suggested, Herjolfsnes sailed through the straits of Belle Isle and landed at the southern tip of Greenland.

He suggested also that evidence of old records indicated Lief Ericson, son of Eric the Red, voyaged up the St. Lawrence a considerable distance about the year 1000 and that the country he named Vinland was in fact territory at a point possible to be at this date.

Col. Bruce said there was evidence to support the belief also that Thorfin Karlsefne and Freydis, a daughter of Eric the Red, reached Vinland about three years later.

Complete Drainage Tunnel

Project Is Only Second Of Its Kind In The World

Vancouver engineers have completed a 200-foot vertical shaft to take care of the drainage problem at Point Grey. It is the only one of its kind in Canada and the only other in the world is at Boston, Mass.

The project was necessitated by erosion, due to melting snow and heavy rain around the Spanish banks which seriously threatened homes and property.

The shaft, near the University of British Columbia, is spiraled with concrete banded to direct the flow and elastically the tremendous speed the water would attain if allowed to drop 200 feet. A worn eye-viewer gives the impression of dropping through a huge, four-foot rise barrier, the shifting representing the spiral grooves.

Two large pipes look after drainage water in the district which flows into a circular reservoir, the water surrounding the shaft. From here the water passes between grids which act as a sieve against debris and passes into non-debris vents. A 12-foot drop and the water starts its climb into the shaft. The centrifugal force built up keeps the water on the flange, leaving the diameter of the shaft from 12 inches to 18 inches. The shaft is created by slanting upwards a short section of the run-off pipe thus breaking the force of the water.

Peculiar Pacific Fish

Had To Obtain Government Permission To Capture Pongulus

Spectators of some of the peculiar fish captured in the Pacific ocean are on display at the Bermuda government aquarium, brought to Hamilton, Bermuda, in Vincent Astor's yacht, Noumea. Louis Morehead, curator of the aquarium, had charge of the 1832 varieties, taken during a 60-day voyage from San Pedro, Calif., to the Outpost Islands in the Pacific and thence to Bermuda by way of the Panama canal.

Twenty-five penguins formed the outstanding part of the vast collection. Curator Morehead explained the permission of the Bermuda government had to be obtained before capture of them, because the species was being depleted by unnecessary slaughter and activity of sharks.

Knew What He Wanted

The customer in the bookshop called up the assistant. "I want," he said, "Louis M. Alcott's 'Jewish novel'." "I'm afraid I've never heard of it," said the assistant. "There is 'Little Women', 'Little Men', 'Under the Lilacs', 'Hans in Bremen', but not 'That's It!'" replied the customer. "I knew she'd written one. Give me a copy of 'Hemlock'."

Steamers are called tramp steamers when they do not belong to any regular steamship company but are chartered by individuals and have no regular routes.

Prevention For Paralysis

Plan To Use Sprays To Curb Spread Of Disease

Plans at the Rockefeller Institute to try a newly discovered method of protecting children against infantile paralysis this summer was first announced to the American Medical Association at Kansas City, Mo., recently.

Thomas M. Rivers, M.D., of Rockefeller Institute, one of the foremost virus experts in medicine, told the subject for infantile paralysis preventive. The paralysis is caused by a virus, a disease agent too small to be found with a microscope.

Experiments in the past year at Rockefeller Institute and elsewhere have revealed that several simple nasal sprays seem able to prevent entry of the paralytic virus into living bodies. The experiments will be made with these sprays.

"Although the use of vaccines and sera," said Dr. Rivers, "at present offers little of value in the prevention and treatment of paralysis, the results of work with agents of another nature seem to present hope that a method of controlling the disease eventually may be evolved."

"It is now believed that the virus of poliomyelitis enters the body from the nasal mucous membranes by way of the olfactory nerve. With this idea in mind, a number of workers have conducted experiments with several viruses in more than one host in order to ascertain the nature of the virus and the means by which it enters the central nervous system can be blocked by the application of simple chemical substances to the mucous membranes of the nose."

A "neutralizing virus" is one which attacks nerve cells. A "host" is the animal receiving a virus inoculation.

Three nasal sprays which seem to block the virus were described by Dr. Rivers. One is tannic acid, which protects horses against the virus of encephalomyelitis. Another is a solution of silver nitrate which protects mice against the virus of poliomyelitis. A third is a solution of silver nitrate which protects mice against the virus of poliomyelitis.

Had Right Viewpoint

John Quincy Adams Believed Body Is Just A House

Do you remember that quaint ancestor of yours who expressed the opinion that the body was just a house? John Quincy Adams, gave, at the age of 80 to a friend, when he met in a Boston street? The friend asked him "How do you John Quincy Adams today?" and the answer came: "Thank you, John. In the house of my body I feel quite well, I thank you. But the house in which he lives at present is becoming dilapidated. It is deteriorating upon its foundations. Time and the seasons have nearly destroyed it. Its roof is pretty well worn out. Its walls are much chattered, and it trembles with every wind. The old tenement is becoming uninhabitable. And I think John Quincy Adams will have to move out of it soon. But he himself is quite well, quite well."

Print Section In Gaelic

Scottish Newspaper Provides Service Twice Every Week The Daily Post-Record of Sydney, Nova Scotia, is one of the few newspapers in the British Empire that makes regular provisions for its Gaelic readers. Twice each week it contains a section in Gaelic, and the publishers report that in the two years this practice has been followed the Gaelic pages have grown steadily in popularity. "There are more Gaelic-speaking people in Eastern Nova Scotia," said the Post-Record recently, "than anywhere else in the world outside the Highlands of Scotland."

Taking The Oceans

Royal Canadian Mounted Police, charged with the duty of taking the census in Western Canada's northlands, will have five parties out on their last week's summer, looking up basketry, traders, Indians and others, for Ottawa's statisticians. Preparations for sending out the parties have been proceeding for months, according to Sgt. R. H. Tall, R.C.M.P.

Britain has paid \$5,750,000 in pensions since the beginning of the World War. 2153

ETHIOPIAN EMPEROR IN EXILE

Emperor and party

Little of the pomp and ceremony accorded him when he Haile Selassie, Emperor of Ethiopia, "King of Kings" and "Son of Judah," marked the arrival of the emperor when he landed at Haifa, Palestine port, accompanied by his two sons and escorted by a British officer.

Why Rabbit Changes Color

Fur Turns White As Protection Against Cold

The snowshoe hare does not change his color hurriedly in winter to match the color of the snow but does so gradually to give himself the warmest possible coat. Dr. Seymour Haden, of the Ontario National Research Foundation, Toronto, told the biological section of the Royal Society of Canada.

Dr. Haden, who has been working for years on pigmentation and other characteristics of fur, reported he found the winter coat grows in gradually, pushing the way through the summer coat which falls out gradually. He corrected his previous belief that the white coat comes from depigmentation of the hair.

The winter hairs at first grow without color but color appears below the tips later in bands. Dr. Haden explains, physiologists informed him, give the animal a coat which could much of the heat of the sun and retained it in the colored bands below the surface.

The color phases in the animal he suggested, were due not to a hereditary instinct prompting him to make himself as inconspicuous as possible but more likely to another hereditary trait prompting him to protect himself against the cold of winter and against sunburn in summer. He pointed out pigmentation is a protection to the skin against injury by the sun.

"Take the snowshoe—here in another climate, warm in winter, he said, and he would still change his color in the snow and summer because his heredity makes him."

The village of Childershire, 18 miles from London, England, boasts two new houses in the past 20 years. There are between 50 and 70 inhabitants.

Nearly 1,400,000 tickets are being printed for the 1936 Olympic Games in Berlin.

Home Is Merrier For Lively Terrier

PATTERN 5539

Care, isn't he—this Scottish pug, and where's the home that wouldn't be merrier for him and his plump or picture he adorns long before the first simple straight stitch is in. Worked in cotton, silk or wool fine in shades of blue, green, red, yellow, black, and white. The white is in the center, and give him a bright touch.

In the center, you will find a transfer pattern of a dog 10 1/2 x 12 1/2 inches, a color chart and key material requirements; illustrations of all stitches used. To obtain this pattern send 20 cents in stamps or coin (not preferred) to: Household Art Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Al Brooks pattern book published

New Venture In Oil Prospecting Indicates Oil Stores Miles Below Surface

As They Saw It

Young School Girls Pay Visit To House Of Commons

Forty little girls, aged 10 and 11, seated sedately in rows in the victory gallery, absorbed what they could hear of the speeches in the House of Commons at Ottawa as part of their education. Afterwards in a bay windowed room of a parliamentary corridor, they were questioned by their teacher, Miss Margaret McLean.

"The girls have been studying 'Olive' all year and after this trip to give them a general idea of how laws are made by men whose pictures they had seen in the papers, they were keen to show their knowledge."

"They know why we have the prime minister? A dozen hands went up: 'Mr. King.' The gentlemen clustered around Mr. King were questioned by their teacher, Miss Margaret McLean.

"Who were those closest to Mr. King? A hand or two went up. They were the cabinet ministers. What were the gentlemen doing? One solitary hand went up. 'They are making laws for Ottawa.' No, that was quite right, said Miss McLean, they were not making laws for Ottawa but Canada, and provinces and one territory. And what did they do this afternoon? There was a general silence, then an outburst: 'They couldn't hear!'"

Finally an older woman asked a question: Did the children think the members looked very clever? The answer was the most unanimous: for with one voice. "No."

Has Abandoned Literature

Robert Service, Poet Of The Yukon, Turns His Attention To Music

Robert Service, poet of the Yukon, turned his attention to music. He was the supreme court of Canada, declared his old friend, Robert W. Service, poet of the Yukon, had written many songs and is thinking of publishing them.

Burns, who met the poet in the Yukon, was working with a bank, said his friends were that he had abandoned literature and was now writing songs. Burns, who met the poet in the Yukon, was working with a bank, said his friends were that he had abandoned literature and was now writing songs.

The letter, written from Cold-Nord in France where Service has made his home, reads in part: "I am not a musician. I don't believe in it. I try to develop capacity of mind and character (intelligence). Also, I have my capacity for music."

I am of the opinion that mental obtuseness is a great factor on longevity. In fact, a certain cheerful idleness is leading. "I am afraid that now the memories of my Yukon days are faint and I was content to be a housewife, everything else into insignificance. I saw so much hardship and horror in the Yukon that I was a hero, so that the Yukon days seem relatively unimportant."

Alberta Receives A Gift

New Hamburg German Moorfoot As A Game Bird

Germany has reciprocated Canada's gift of moose and buffalo sent to the Berlin zoo with two pair of European moorfoots.

Alberta Game Department officials believe this is the first time the birds have been brought to the province. The moorfoots were received through G. von Krüner, trapper and game warden, who arranged the shipping of the moorfoots and buffalo.

Mr. Von Krüner said he hoped it would be possible to develop a new sport for hunters in several years as the moorfoots multiplied.

The birds have been placed under protection of the Alberta Fish and Game Protection League, and will be housed in Edmonton.

Metal Was British

An interesting revelation, says the St. Thomas Times-Journal, is that the Zeppelin company bought the test of framework of the British ship R-101, which was driven down by storm in France some years ago melted it down and re-poured the metal into the framework of the Hindenburg. To the R-101 flew the Atlantic after all.

A certain minister, while practicing, said that every blade of grass was a sermon. The next day he was summing himself by moving his hand when a parishioner passing by said: "That's right, doctor, cut your sermon short."

Keep Anxious At Bay

Don't let pessimism discourage you kill your anxieties by telling you that the thing you propose to do is absurd, that "it can't be done." Those "practical" souls cast the vision that you see. They don't feel that more things which are constantly being done by the human hand. They don't realize that it is the call that runs in your blood, a divine call to do the thing that you were sent into the world to do.

Bananas, introduced into western Canada by a parishioner passing by said to have been eaten by the ancient Egyptians, Greeks and Romans.

The mapping of buried shore lines, a new venture in oil prospecting which indicates untold oil resources five miles below the earth's surface, was described at the International Petroleum Exposition at Tulsa, Okla.

Present deepest American oil wells go down two miles. The new maps, charting the contours of more than 100 different seas, which covered parts of what is now the United States from time to time in the last 100,000 years, indicate untold oil resources still within the present two-mile drilling depth limit—and more deeper down.

This new mapping, originated at the University of Tulsa, was described by L. R. Leedom, professor of geology. He said the newest oil prospector device, the map-made earthquake analysis has revealed its limits. It will continue to reveal the "dome" oil-bearing structures.

But, he said, the greatest resources are not revealed by the artificial quakes. These new resources lie just inside the buried seashores charted by the University of Tulsa.

The shorelines of the ancient seas were traced by erosion with silt and debris from their lived continents billions of marine animals from the size of pin points up to mollusks, called ammonites, 10 feet in diameter.

As the seas rose and dropped into the mud, each left at least one tiny droplet of imperishable oil—in days of petroleum. The droplets were buried, these shores and turned the mud to stone. Wherever porous stone was formed, the oil gathered in the "pockets" of the sand.

These ancient shores can be identified by the fossils which the drills bring up. Nearly 1,000 different kinds of these fossils are recorded at Tulsa. They show when the seas were in and out of the land, when the sea extended to the land up sea beds are no longer level but tilt at angles.

Motors To Replace Horses

Canada Considering Plans To Mechanize Artillery Units

Something suggestive of the principle that "the old grey mare ain't what she used to be" is leading the Department of National Defense to go in strongly for mechanization of its artillery units. The motive force is disappearing, and it won't be long now before it passes completely out of the artillery picture, unless some steps are taken. This is what is happening in Great Britain and other countries and the Canadian government is taking steps in Canada, with due regard to the limitation of available funds. There are several hundred old horses in the Canadian army, and they are being replaced by motor vehicles. The intention is to use the same guns, but with motors for propulsion. It is not to be long before the horse of the section a statement on this question will be made in Parliament, giving details and expounding the possibilities of reorganization.

Idea Is All Wrong

Because of the "stupid and insane" phrase "too old to do," there are thousands of men in every branch of the professions who will never find employment again, declared the Lord Mayor of London (Sir Percy Vivian), at the Mansion House, E.C. He was presiding over an appeal against the "too old to do" clause of the Association, Ltd., and the "Forty-Five" Housing Scheme, Ltd., on behalf of unemployed men in more than 40 houses positions placed them out of the unemployment benefit scheme. Sir Percival Vivian said that it was impossible to judge people physically or mentally by a mere period of years. Men were old at 50 and not young at 60.

Age Does Not Always Affect A Person's Ability

Sir Percival Vivian said that it was impossible to judge people physically or mentally by a mere period of years. Men were old at 50 and not young at 60.

Age Does Not Always Affect A Person's Ability

Because of the "stupid and insane" phrase "too old to do," there are thousands of men in every branch of the professions who will never find employment again, declared the Lord Mayor of London (Sir Percy Vivian), at the Mansion House, E.C. He was presiding over an appeal against the "too old to do" clause of the Association, Ltd., and the "Forty-Five" Housing Scheme, Ltd., on behalf of unemployed men in more than 40 houses positions placed them out of the unemployment benefit scheme. Sir Percival Vivian said that it was impossible to judge people physically or mentally by a mere period of years. Men were old at 50 and not young at 60.

"PROSPERITY BONDS"

The introduction of "Prosperity Bonds" by the Edmonton government appears to have caused more excitement, complaints and discussions than any legislation introduced by the S. C. government since it came into power. Although this new legislation is not yet thoroughly understood or explained many previously staunch supporters of the S. C. government are finding fault with it and cannot understand how it can be made workable, especially those who are in business for themselves. The question they are asking is "How are we going to finance our business on paper which is not negotiable outside the province or at our own banks and are not redeemable for a period of possibly two years."

Another complaint by the same people is that the handling of these bonds is simply another tax on the public, imposed by a party that promised not to increase taxation if or when they got in power.

On the whole the introduction of "prosperity bonds" is an experiment and causing quite a sensation and may sooner or later lead to law suits to find out whether or not it is legal or within the jurisdiction of the province.

Officials of the Vimy Ridge pilgrimage left last week-end for England and France to complete arrangements for the trip next month.

Governor Lanfow of Kansas has been chosen by the Republicans to oppose President Roosevelt in the U. S. general election next November. He promises that if elected, his party will throw out the reciprocal trading policy under which the Canadian United States trading agreement was born.

Snaps

THIS is the great outdoor season and that means the great snapshot season. All over Western Canada cameras are busy clicking away, recording occasions of work and play that take place in these long summer days. Naturally when you take a picture you take it for the purpose of preserving a memory. It is important, then, that whoever prints that picture for you prints it in such a manner as to give the most lasting and permanent impression that it is possible for you to get.

In a case like this, it pays to pay for the best. These snapshots records are important to you. Send your films, then, to EATON'S for printing. Here, expert workmen working with the finest of material, in workrooms boasting the most modern equipment, all combine to give prints that are clear, clean-cut and, above all, permanent—all at prices that are really low when you compare the quality of work turned out.

EATON'S

SAVAGE WATER

Bleaching Fluid

A Great Wash Day Help

Removes tea, coffee and other stains from white cotton and linen and bleaches yellow cotton beautifully white in 20 minutes without boiling the clothes.

New Aid To Comfort

Air Conditioning Is Rapidly Becoming A Real Necessity

Perhaps no industry has made so much from beginnings of such small premises as air conditioning. Its origin came from efforts to control atmospheric conditions in quality, vigor, photo supply and textile factories because of the necessity for protecting the product. From this research came developments which soon spread the practical application to theatres, restaurants and other places of public assembly, where in winter temperatures would increase patronage. Then came railway experiments to prove that air conditioning of passenger cars would solve the problem of ventilation which has been a bugbear to the master car builder ever since the first steam locomotive was built. Following closely on railway adoption, the owners of office buildings commenced to realize that air conditioned space would attract tenants. Now residential construction is giving thought to this new aid to comfort. Air conditioned apartments, schools, factories are just around the corner. Indeed, a few such buildings have been constructed to show that there is no limit to the future of the industry. — Chicago Daily News.

Training The Mounties

Police Are To Have Life-Saving And Photography Courses

Training in swimming and life-saving and instruction in photography are planned for the Mounted Police, said Major-General Sir James H. Maclellan, commissioner, on a visit to Regina, Sask.

A course in photography will be gradually built up this year, but the swimming and life-saving instruction will not be undertaken until the swimming pool is erected at Regina headquarters, and then it is the possibility of this being done this summer, said Sir James.

While it is not likely the swimming pool will be installed, Sir James said he was hopeful the new gymnasium would be built at Regina headquarters this summer.

A proposal is to have a school for all types of training, officers of other corps to be given instruction so they can return to their own forces and act as instructors.

The school, said Sir James, would be similar to the school operated by the United States Federal Investigation Bureau at Washington.

Depression Is Unknown

Demand For Copra Drops But Is Being Prospected

Depression is almost unknown in the South Pacific Islands, A. B. Farquhar, major planter of the Fiji Islands, said during a brief visit to Calgary, Alta.

Mr. Farquhar, returning to England for the first time in many years, great war, stated the island group, administered as a crown colony by the British government, was experiencing a commercial boom.

A fine automobile road 170 miles has been constructed on Vavua Levu, second largest island of the group, and the site of its plantation. It will soon be possible to motor the entire 250 miles across the island's coast.

Although demand for copra, main produce of the group, has declined slightly in the past two years, Mr. Farquhar added several promising gold strikes have attracted attention. Crop failures of island produce have been rare.

Settling On Farms

Many Moving Into Peace River District Says Anglican Bishop

Thousands of men and women from Calgary, Edmonton, Winnipeg and other western cities were trickling into the Peace River district settling on farms, reported the bishop before noon yesterday. Rev. A. H. Beveridge, bishop of Athabasca, said an informal gathering of Anglican clergymen at Ottawa. The backing in the land movement was becoming important proportions and it should become a prime factor in solving the nation's unemployment situation, he said.

"Did the plumber come down to inspect the pipes this morning?" "Yes."

"What did he say?" "He said there was nothing the matter, but he could soon remedy that."

Some noisy relatives were visiting, cough, and happened to mention their dog, a big mongrel.

"He's just like one of the family," said the pup's proud mistress.

"Which one?" asked the hostess.

KING EDWARD VISITS SITE OF MEMORIAL TO HIS FATHER

His Majesty King Edward paid a visit to the old brewery site below the Castle at Windsor, where it is proposed to erect a local memorial to King George V. The memorial will take the form of a Garden of Remembrance, with a bronze bust of the late King in the centre. Our photograph shows His Majesty the King discussing details of the plan with the Dean of Windsor, Lord Wakefield and other officials.

A Study Of Facts

Plan For Three-Phase Study Of Statistics Made By Dr. Costa

A plan for a three-phase study of statistics in Canadian universities was contained in a presidential address delivered by Dr. R. H. Costa, Dominion statistician, before a joint meeting of the Canadian Political Science Association and the Canadian Historical Association, Dr. Costa is retiring president of the political science body.

Dr. Costa said he believed there should be in every Canadian university three things—a thorough training in statistics technique, that which none has made more pertinent studies or fashionable, however, weapon for new truth; a working acquaintance with the content of official Canadian statistics; and a "pass" course for the general student.

"The user-to-be" of statistics. Of the last he said: "I do not think that anyone will pass as educated in the world of tomorrow who has not rudimentary knowledge of the laws of mass phenomena."

Dr. Costa dealt with statistics affecting population, a phase, he said, of "tremendous interest to Canada."

"We cry out for population," he declared—"for immigration, especially from the British Isles where density (of population) is 300 to the square mile, whereas ours is only two and a half. But the hard fact is that in the last 10 years the increase of births over deaths plus returned Canadians—home of our home—was greater by 100,000 than the total we actually added."

He spoke of the exodus of Canadians and said Canadians were getting less rather than more of our "white collar jobs, and it is a pregnant fact that a big exodus of Canadian colors after, rather than before, a war immigration movement."

Expected Interest

The town Shylack lost his purse with quite a sum of money. It was found by a honest man, who advertised for the finder. In reply, the advertisement was answered, and the name was satisfied that it belonged to the owner, cheerfully returned it to him.

The contents of the purse were counted several times, to the discomfort of the finder. "Isn't it all there?" he asked.

"Yes, but you should remember—you had it over a month."

Just A Comparison

It would take 11 years of lettuce salad each day, or 1,200 servings of beans, or 2,230 servings of tomatoes to obtain the amount of vitamin D contained in one teaspoonful of cod liver oil, claimed Dr. F. V. Tisdall of the research laboratory, Hospital for Sick Children, before the 49th annual meeting of the Canadian Dietetic Association in Toronto.

In India there are catapiles 18 inches in length.

Keeps Improving His Voice

Lloyd George Has Critics In Audience Whenever He Speaks

In every audience to which Lloyd George speaks, sits a "mystery woman" whose sole business is to criticize his voice and help him to improve its quality and effectiveness. Nancy Tyrer, director of Hart House theatre, told members of the Advertising and Sales Club in Toronto. The famous Welsh statesman had told her personally of the importance he placed on his voice, she recalled.

"One's voice can do everything," she declared. "On the stage it breaks people's hearts, or it lifts them to the heights. People often have pleasing appearance, but their voices are dull and colorless. They should be living fountains."

Spotlight For Bicycles

Gadget Has Been Invented By Young Repair Man

An invention that is expected to prevent many traffic accidents involving bicycles was announced by Julius Pahal, young proprietor of the Edmonton bicycle repair shop. The gadget, of a simple construction, is a stoplight that flashes when a cyclist gets on the brake. Pahal intends to manufacture them.

Russia has started a campaign for the cultivation of more cotton.

PICTURESQUE WEDDING IN HISTORIC YORK MINSTER

More than 2,000 guests watched the brilliant wedding in York Minster of the Earl of Peterborough and the Miss Anne Wood, daughter of Viscount Halifax, former Viceroy of India. The bride and bridegroom leaving the Minster Cathedral under an archway of swords turned by the Guards of Honour from the Yorkshire Hussars.

Prolong Life Of Teeth

Use Of X-Rays Cuts Dental Bills In Half

By early and efficient use of X-ray the life of a normal set of teeth can be prolonged 20 years, according to Dr. Clarence O. Simpson, 60, Leslie Ave., internationally known radiologist, who was in Toronto recently to address the 60th annual convention of the Ontario Dental Association at the Royal York.

Another outstanding dental authority in Toronto for the convention was Dr. Russell W. Trench, of New York City, M.P., whose observations on the latest developments in denture work in which he specializes, was sought by The Toronto Telegram in a joint interview with Dr. Simpson.

"Early" X-ray, Dr. Simpson declares that in order to obtain full benefit from X-ray work it should be undertaken when children are five or six years of age.

"Isn't the cost prohibitive?" he was asked.

"No," was the reply. "If X-ray work is done at an early age and continued periodically, it is my opinion that the person in the normal course of life-time can reduce their dental bills by half."

"Furthermore," observed Dr. Simpson, "probably causes the loss of more teeth than straight decay. If X-ray is used a dentist can detect the commencement of this mouth ailment about ten years before it could otherwise be determined. The disease is insidious and slow in developing."

Actual decay is an apparently healthy tooth can be detected two years before a dentist could ordinarily find it out, Dr. Simpson continued. X-ray, he added, is invaluable in determining in a child whether an out-of-the-mouth "pull" is warranted, and of teeth will develop properly.

Mention of out-reported cases of a loss of teeth drew a broad smile from Dr. Trench. He said that millions of radiographs are taken of mouths and he has never yet heard of X-ray plates revealing a third set of teeth in the office. The "third set," he believed, are simply "delayed eruption" which sometimes takes place when a person is well advanced in years.

At the present time, Dr. Trench declared, a person earning the smallest salary can afford a better set of artificial teeth than had George Washington—no great has been the advance in this work.

Becoming used to the use of artificial teeth is an art, Dr. Trench observed. He said it was like learning to swim or ride a bicycle—the owner of the set having to learn co-ordination of facial muscles with the plates. People with artificial teeth should at the outset take pains to learn the proper use.

Neither Dr. Simpson nor Dr. Trench believed that state dentistry was being inaugurated in either Canada or the United States for at least many years. State control might be applied to medicine and hospitals, but not to dentistry, said Dr. Simpson.

Ancient Love Potion

Scientists Will Attempt To Discover Secrets Of Early Plant

Scientists in an attempt to discover the secrets of an ancient love potion of Caylon.

Bulls of the Naga Mary, Ala, a plant which, according to tradition, has the magical powers of making one person fall in love with another; have been sent to London for examination by chemists.

The plant is a small species of rose with a flower like a lily, with five or six spreading purple-blue petals.

Centuries ago, the story is told, a prince was walking with his sister in the jungle when she asked him for some line to save her that she was eating. He drove her ahead into the ground and handed her some up the tip of it, for by strict ritual law no man could touch his sister. On taking it she immediately fell violently in love with him. He looked to the ground and saw that his sword had passed through a small vine, the juice of which had stained the blade.

This juice, he was convinced, had worked this magic in his sister.

Employment Manager: "Well, Sam, what can I do for you?"

Sam: "You all don't know anybody who don't want to live nobody to do nothing for nobody, does you?"

"I have just bought a second-hand car," a correspondent wrote. "And I am wondering where I am likely to find defects in it." About 100 miles from the nearest garage, if his luck is anything like ours.

What is fitting is honorable, what is honorable is fitting.

Sees Cities On Wheels

Prospect Will Open New Field For The Automotive Industry

The city of the future may be composed largely of mobile units erected on wheels, the latest of foundations, according to William B. Stout, former president of the American Society of Automotive Engineers.

Already this futurism has begun, he declares, and economic conditions as well as the development of the automotive form are the two factors that assure its steady progress.

Stout points out that a large part of the population of the United States is constantly moving. From the present status of merely families on wheels it will be only a step to cities on wheels, he believes.

Economic advancement, he says, is bound to meet the situation by devising homes which can be wheeled about in sections. This will merely be a step further than the present automobile home-trailer idea.

But this is not, Stout foresees, will entail the succession of political management of cities by business management, for the taxpayer will simply move to the city with the most economical tax program and with the best managed business establishments.

Stout professes to see the dim beginnings of this future American city on wheels in trailer camps in Florida. He declares that in one of these he has seen 150 trailers with their inhabitants enjoying all of the comforts of home.

It will be a step more, he says, toward the establishment of community interests and then the mobile city of the future will be on wheels.

The mobile city, he thinks, will not only prevent economic advantages will appear in the business instinct of human beings. To make it more and more probable, he declares, it will require the expansion of the automotive industry to that is not likely to overlook its possibilities for increased production.

Could Be Improved

German Countess Thania Womans Should Help Zepellins

Zepellins are perfect for transoceanic travel if those who design them are intelligent enough to know something about their likes, in the opinion of Countess Thania von Waldock of Berlin, one of the dozen fondles passengers who arrived in the U.S. on the Hindenburg on its special first regular flight from Germany.

Unless she was mistaken, she thought a misprint designed it, she told interviewers. "One couldn't dress properly for dinner and that's a problem," she exclaimed. "I always wear dinner. Certainly was a problem." The German countess confessed that she would probably continue to travel on airships but hoped a woman would have some say about their appointments. Zepellins should have full length mirrors, she said.

Lady Drummond Hay, an enthusiastic air traveller, thought arrangements should be made for relaxing light and pleasant food, the last part to be in a double cabin would not disturb the other party.

Zepellins travel was good for health and beauty, Mrs. Charles B. Parker, of Cleveland, believed. "It's a wonderful beauty secret. Everything is so calm and effortless," she said. "There is no nervous strain, but any woman knows how that affects her appearance."

Fortune Brings Worry

Household Finds Legacy Brought Deluge Of Marriage Offers

May Jackson, a housemaid of Lancashire, England, appears to be the beneficiary of the provision made for her in her former employer's will. When she found out that a number of other people wanted to appreciate it too.

Miss Marjorie Brown died at the age of 84, and left her house worth £25,000 (\$313,000). When the will was probated Miss Jackson left her home for an unpaid vacation over the weekend, in order to escape a deluge of offers of marriage.

Prevent Doctors Wrong

Dr. William Mallinson, timber merchant and a generous benefactor of educational, religious and philanthropic causes, died at Altham, Northampton, England, at the age of 81. He was created a baronet and was a public service. He was 24 years old he was refused life insurance because he was told that he did not have long to live. Thereupon he vowed that if he survived he would devote his life to the service of others.

Buckingham Fine Cut 100

WORLD HAPPENINGS BRIEFLY TOLD

Dame Clara Butt, contralto, who died in January leaving \$197,500, bequeathed \$15,000 to the Royal College of Music.

Consideration of a bill suggesting abolition of hanging as a method of capital punishment was postponed in the House of Commons until another year.

Silver medals for Admiral Richard D. Byrd and his men on the second Byrd Antarctic expedition were voted by Congress with house passage of a Senate-approved resolution.

An agreement to appropriate \$20,000,000 for the United States navy for the fiscal year beginning July 1 was reached at a meeting of the Senate and House of Representatives conference committee.

First school in Canada to include a course in highway safety and automobile driving in its curriculum, Amberburg high school near Windsor, Ont., will launch the course Sept. 1.

Allegations of beating a native servant with thorns were made against Michel Reinette, a French planter, committed for trial at Natal, Kenya Colony, on a charge of causing bodily harm to the man.

Arrested on a charge of shoplifting, Joseph Shalagel, while awaiting trial in Glasgow, ate a number of bolts, a spring, a lens from his glasses, and pieces of metal from the cell furnishings.

Payment of a \$2,000 mortgage saved the home of Mrs. Eugene Field, 60-year-old widow, from sale under a foreclosure judgment. The cheque was provided by Phi Delta Theta, Field's fraternity.

G. C. Tryon, postmaster-general, announced in the House of Commons a further reduction in trans-Atlantic telephone rates between London and Montreal and London and New York, effective July 1.

Political Patronage

University Professor Advocates Change in Civil Service Methods

Prof. R. MacGregor Dawson, of the University of Saskatchewan, told the Canadian Political Science Association the two enemies of civil service efficiency in the Dominion were political patronage and the organization of the service itself.

To improve the service he suggested in a paper to the association's annual meeting an examination system that would weed poor candidates and select the best, a scheme of graduation which would induce the highest type of intelligence to try to enter, a plan of promotion which would allow exceptionally brilliant men to come to the top and a range of salaries providing a comfortable living.

Of about 62,000 positions in the government today only 33,000 or 53 per cent. are filled by the civil service commission, he said. Many parts of the service which could be brought easily in conformity with the merit system, such as the Income Tax branch, penitentiary service and the radio commission, did not come under the Civil Service Act.

When you're putting coal in the furnace you're not being asked to put up the screen.

Aylesbury, England, has ruled that only dog may live in each house.

LAME BACK

Old Pills give prompt relief from backache resulting from deranged kidneys. They soothe and heal irritated tissues and assist the kidneys in their function of eliminating poisons waste matter from the system.

Proves His Claim

Pioneer Resident Says Alberta's First Oil Found 57 Years Ago
Proof that the first crude oil was found in Alberta in November, 1879, 57 years ago, is held by William McCordell, well known pioneer resident of Banff.

Mr. McCordell produced a letter from Joseph Lake, now residing at Invermere, B.C. This letter stated that in November, 1879, he was managing the Carlin and Lake store in Anahkute, near Edmonton. "Billy McCordell and Lafayette French," he states, "brought in crude oil from the mountains. It was sent to Ottawa to be assayed. It consisted of 95 per cent. lubricating oil and five per cent. vegetable matter."

Mr. McCordell also received a letter from Howard Shillad of Banff, now in California, who stated he was in charge of the Scott and Leeson ranch, 10 miles south of Morley, in 1879. Mr. McCordell and the late Lafayette French brought in samples of crude oil to him and it was tested in a lamp.

Mr. McCordell stated the oil was found near Waterloo Lake. A company known as the Homestead Oil Company was formed with a capital of \$10,000 to develop the finding. Unfortunately a sail the previous day of a crude oil, gusher was drilled in. Then a prairie fire burnt down to an end and the venture came to an end.

Shortly after the opening of the present century, the Rocky Mountain Petroleum Co. was organized, a well is being drilled by Oil City Resources, Limited, in the Waterloo district.

New Filtration Method

May Replace Chlorine As Water Purification For Swimming Baths
Initiatives to keep bath water safe have been successfully experimented with by scientists in Sweden. In a room high above the Strand a London scientist has been watching a daily battle between microscopic animals—bacteria and protozoa, the later always winning. This fact is the basis of a new filtration system for swimming baths.

Most methods of water purification for swimming baths, according to Edward H. Hill, the scientist in question, rely on some killing agent such as chlorine. The new method consists of supplying the swimming bath water through a series of filters of special earthy material isolated with cultures of protozoa—the natural enemy of bacteria.

Scorn Electric Devices

Professionals Polish Eggs In Russia With Their Feet

One profession in Soviet Russia has successfully resisted the age of mechanization which has eliminated many age-old methods of work. Floor polishers, who since the time of Catherine the Great have "polished" one shoe on one shoe off, continue to "manipulate with the bare foot" wax, brushes and polishing cloths. Proud of their profession, many have developed a distinctive dance to impart the final bit of polish. They successfully have prevented introduction of electrical polishing devices.

Fresh Air Seems Scarce

According to Figures Showing Pollution Breathed Into Lungs
British breathe, it has been computed, per breath about 13,000,000 coal-produced particles, 700,000 glass particles from automobile exhaust, 37,000 rubber-dust particles, 20,000 tobacco-ash particles. Proponents of greater government efforts for combating atmospheric pollution use such figures as propaganda, permitting the public to imagine what the inside of their lungs look like.

On an average, there are 1,200 thunderstorms in progress in this world at any one moment. These give 800,000 lightning flashes an hour.

In England, peanuts are called "carlinuts."

EX-CLERK TO WED MILLIONAIRE

Olive Hamilton

Attractive Olive Hamilton, former hotel clerk, fell from her rowing boat while rowing near the palatial yacht of William R. Leeds, young millionaire, several years ago. The艇板 he proceeded to "fall for" her, their romance dating from his rescue of the false maiden. Their marriage plans were revealed while the two were cruising in Southern waters. A new picture of the "lucky lady" is shown above.

Returning A War Relic

Coast City Sends Back An Exquisitely Carved Pont Cover

Responding to a request for return of oil relics removed from historic St. Martin's cathedral, Ypres, Belgium, destroyed in 1915 by German quads, Victoria has forwarded an intricately carved foot cover which stood for several years in Christ Church cathedral in Victoria, B.C.

The Belgian church, noted for some exquisite carvings, was almost destroyed during the war, and many of its most valued pieces disappeared. After citizens of Ypres decided to rebuild the structure, an appeal was sent to all allied and central powers for return of any pieces carried away by opposing troops. Officials report hundreds have already been returned.

The oak foot cover, five feet in height, appears to be very old and is elaborately carved by hand. How it found its way to the coast city is not definitely known.

The last war was not to end war. The next war will end everything.

New Theory For Longevity

Egyptian Thinkers Keeping Brain Well Kept In Mind

Learning shortens your life. That is the conviction of a 112 years old man in Cairo, Egypt, Am Mohamed, a milkman, claims to have just completed 112 years and still milks his goats, and delivers the milk from door to door, as usual, after climbing several flights of stairs. His recipe for life is: Don't drink, don't smoke, don't indulge in pleasure, and, above all, don't tire your brain with learning. Mohamed enjoyed his great, and the most of them consist of beans, and the three of meat and vegetables. He has married only once. His wife is still alive. Her "baby," their youngest son, is aged 65.

Have Many Telephones
There are 500 people in London who have telephones in their homes. They are doctors, actors and business men. Many subscribers have a telephone in every room, and some even have them in their conservatory.

Sea-Gulls Always Wild Turkeys Captured Right After Hatching
A sea-gull captured three or four days after hatching can never be tamed. Its mother or other grown birds have taught it fear, Dr. John Tait, of McGill University, Montreal, told the biological section of the Royal Society of Canada in Ottawa. Dr. Tait said the parent or other adult gull communicates to the young by a "roundabout mode of conditioning" a fear-complex which it never loses.

A gull taken just after hatching, he said, may grow up without fear of man, but "the repeated warning call of the adult prevents and maintains in the young bird an instinctive characteristic reaction of apprehension. In other words it is ready on one single exposure to become permanently fear-conditioned to any animal recognized as strange."

Gives Talk On Barrie

Mrs Ann Buchan Believes He Is The Greatest Of All Literary Successes

Authors are often a "and disappointment to those who meet them after reading their books, according to Mrs Ann Buchan, author-memoirist of the governor-general of Canada, who gave an address on Mr James Barrie at Ottawa. Mrs Buchan is known to the reading public as O. Douglas.

Through the applause of the audience belied her words in her own particular case, Mrs Buchan spoke of the "charismatic experience" of meeting Mr James Barrie "once when I was very young." She said he scarcely spoke one word and then, placing a tea table beside her, remarked: "Most people knock this table over, perhaps you won't."

She said she had found it difficult to associate "this little man" with the author she previously described as a "real Peter Pan, a boy tinged at the skirts of this world begging it to stop and play with him."

Mrs Buchan called Barrie one of the greatest of all literary successes and traced his history by telling amusing anecdotes from his humble home in the small Scottish town. She emphasized his devotion to his mother who, she said, appeared in different guises as the heroine in all his stories. When speaking of his qualities as a friend, she said: "I met Capt. Robert Falcon Scott, the explorer, dying in the Antarctic, had written Barrie about his death and his son, Peter. The explorer said in his letter: I have never met a man in my life I loved as well and more sincerely."

In speaking of his success as a playwright Mrs Buchan laughingly said that Barrie had been the subject of a letter to the Barrie house brought a cheque.

In the course of her lecture the speaker gave a Scotch dialect recipe from Barrie's life and his most widely read books.

Cannot Be Tamed

Sea-Gulls Always Wild Turkeys Captured Right After Hatching

A sea-gull captured three or four days after hatching can never be tamed. Its mother or other grown birds have taught it fear, Dr. John Tait, of McGill University, Montreal, told the biological section of the Royal Society of Canada in Ottawa. Dr. Tait said the parent or other adult gull communicates to the young by a "roundabout mode of conditioning" a fear-complex which it never loses.

A gull taken just after hatching, he said, may grow up without fear of man, but "the repeated warning call of the adult prevents and maintains in the young bird an instinctive characteristic reaction of apprehension. In other words it is ready on one single exposure to become permanently fear-conditioned to any animal recognized as strange."

National Museum Urged

Organization Suggested By Professor At Manitoba University

Dr. A. H. H. Buller, former president of the Royal Society of Canada, urged the organization should strive to promote organization of a national museum, national library and national botanical garden.

Dr. Buller, professor of biology at the University of Manitoba, suggested the society seek to become financially independent of government aid as soon as possible, but expressed the opinion that until it reached a stage where it was self-supporting the annual grant of \$4,500 it receives from the Dominion government should be increased to \$8,000.

London Zoo Is Lucky

Has Received Four Sacred Cave Beasts From Malaya

Four Sacred Cave snakes have arrived at the London zoo from Malaya. Their kind has never been shown in captivity before, and their capture was an astonishing adventure.

"The snakes are five feet long and marked by two white stripes head to tail. They came from the Batu caves in Johore. These caves are long subterranean passages, the entrance to which is guarded by native native temples, whose priests are often strangers to enter the caves."

Valuable Gift For Manitoba

Donation to the University of Manitoba of a prized collection of Icelandic books by Amjotir B. Olafson, of the Ministry of Education, was announced by President Sidney E. Smith. Collected over a long period of years the books, comprising 2,200 volumes, are believed unequalled in any Canadian university.

Coleman Hot Plate Cooks with Air!

YOUR GARDEN

General garden insect enemies are divided into two groups—those that eat holes in the foliage, and those that suck out the juices. For the first-named, poison is the best remedy, but the suckers are attacked with a burning spray which penetrates. Often when both are present, a combination of the two is something that burns, such as lime sulphur and arsenate, gives the best results. The damage from the sucking insects is usually quite apparent but the presence of the sucking insects is usually at first by a wilting or withering of the foliage. The sucking insects, chief of which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon and a half of water: nicotine sulphate, or "Black Leaf 40," or any other repellent secured from a reputable source. When fungus attacks the plants, the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in warm, murky places, and the soil is usually very rich. The fungus can be killed by spraying with a mixture of dusting with specially selected ground sulphur in a dusted sulphur dust will also protect flowers and plants from rust, if applied when the disease is in the early stages. An ordinary tin can with a hole in the top, and a small amount of water, will make a good dusting. Cut worms which are the major family like plants at the base of the stem are poisoned by spreading sweetened lime around the plants. Green or spotted mixtures about the plants. The green tinner of the plants are the beetles are beans, tomato plants, etc. They will not start to grow until the weather is hot, and they will become very numerous. They will eat all the plants they prefer rich, open soil and any members of the major family like special delight in hot, sandy soil, though they will eat all the plants. It is still plenty of time to make second and third sowings of the plants. All standard vegetables such as beans, carrots, corn, beans, etc.; first early is not out.

Wins Efficiency Trophy

Captain Hosken Awarded Shield For The Fourth Time

Signal honor was paid Captain A. J. Hosken, R.N.M., commander of R.M.S. Empress of Canada, when, at a ceremony on board his ship, at Victoria, B.C., he was presented with the Hosken's shield. This is emblematic of superior efficiency in the Pacific in all matters pertaining to life-saving, including discipline, upkeep and maintenance of life-saving gear, organization with regard to control of passengers, operation of lifeboats, fire drill, and other similar matters.

The shield is awarded yearly, and has been the trophy of efficiency on ships of the fleet since it was first presented in 1929 by Sir Edward W. Beatty. Captain Hosken has now won it four times. He won it in 1929, when he was commander of R.M.S. Empress of Japan, and held it for two subsequent years. Then it went to Capt. L. D. Douglas of R.M.S. Empress of Japan for three years, and now Captain Hosken has won it back. It is the first time it has gone to R.M.S. Empress of Canada, of which Captain Hosken has been in command for the past year.

The presentation was made by K. Burns, port manager during the course of a luncheon on board the ship.

Old Customs Affected

Because Customs are losing their faith in the efficacy of eggs to prevent a more back, the poultry industries are seeking a government mandate to proclaim the festival of Loh Hsin, or "beginning of summer" as "national egg day." Eggs have been a special food of the festival for centuries. Disappearance of old beliefs, however, is affecting the custom.

Want To Fight Like Men

Turkey's young girls, ranging in age from 15 to 20, are ready to fight—and they want to fight like men. "The petition," the Ministry of Education, they asked that military education be given them and that they be treated the same as the boy recruits. Satisfying their compulsory military service.

Redcliff Stampede July 1st

King Edwards birthday on

June 23rd will not be observed

as a public holiday.

Mrs. Kyle and Mrs. Rao, of

Medicine Hat were visitors in

Redcliff on Tuesday in connection

with Girl Guide work.

The local Boy Scouts are putting

up on a flag sale on Saturday,

June 20th to raise funds for

their annual camp. It is hoped

the sale will be well patronized.

Mr. F. Juneau of Edmonton,

who farmed in the Box Springs

district several years ago,

spent a few days in town this

week visiting friends.

Mrs. A. B. Ballantyne was one

of the lucky cash prize winners

in the contest: "Which of the

Dionne Quints would you

adopt?" conducted by Quaker

Cats Co.

Mr. N. Meldrum, divisional

Sales Manager of the Dominion

Glass Plant here, gave an inter-

esting address on "Glass" at

Monday's luncheon of the Medicine

Hat Rotary Club.

Mr. J. H. Bolton has been appointed

registra for Vital Statistics

and also as Issuer of

Marriage Licenses. All births,

deaths and marriages should be

registered with Mr. Bolton.

Crop conditions throughout

this district are showing

marked improvement since the

recent rains. Weather conditions

have been favorable but

more rain any time now would

be welcome. Pasture lands are

also improving.

M. F. Baird who is taking

the census in the Ranier district,

had a car accident near

Tilley last week-end. A wheel

came off and the car turned

over into the ditch. Although

the car was badly damaged

Mr. Baird escaped with only

minor bruises.

Redcliff's trees, hedges and

lawns never looked finer than

they do at present. Many private

homes have been greatly

improved in appearance this

year by extra attention to

lawns and flower gardens. A

walk or drive around town re-

minds one of: "What is so fine

as today in June."

Gordon Memorial S. S. picnic
 will be held Wednesday July 23
 in Central Park Medicine Hat.

Four drownings last Saturday
 should be a reminder to
 parents to warn their children
 to keep away from the river.

Suffield station is opened 'up
 again with Mr. Mercier as agent.
 Mr. O'pense former agent is now
 located at Hutton.

Mr. and Mrs. John Beattie of
 Tees, Alta., formerly of this
 district, motored here last week
 end and spent a few days with
 their daughter, Mrs. Tom Rut-
 erford.

Redcliff Canadian Legion
 Annual Picnic will be held on
 June 24th (Wednesday) in Medicine
 Hat.

Cars will leave promptly at
 one o'clock in the afternoon.
 Don't forget to bring cups and
 your eats.

BIRTH

Ambury — On Thursday, June
 11th 1936 to Mr. and Mrs. Ambury
 a son.

IN LOVING MEMORY

In loving memory of Clara
 Moran who passed away June
 17th 1934.

The charm has from our circle

gone,

The voice we loved is stilled;

A place is vacant with friends

and home.

That never can be filled.

Nothing can ever take away,

The love a heart holds dear;

Tend memories linger ever;

day

Remembrance keeps her near.

Remembered by a true friend

R. B.
